

VAHTS RNA Multiplex Oligos Set 2 for Illumina

N324

Version 22.1

Product Description

VAHTS RNA Multiplex Oligos Set 2 for Illumina is specially designed for RNA library preparation for Illumina platforms. This kit contains VAHTA RNA Adapter-S for Illumina, 8 kinds of VAHTS i5 PCR Primers, and 12 kinds of VAHTS i7 PCR Primers. This kit provides 96 kinds of different dual-index combinations. Using this kit and VAHTS RNA Multiplex Oligos Set 1 for Illumina (Vazyme, #N323) together, can provides libraries with 384 kinds of different dual-index combinations.

Components

Applications	Components	N324-01 (192 rxns)	
Universal Adapter	VAHTS RNA Adapter-S for Illumina	4 × 240 µl	■
VAHTS i5 PCR Primers (RM509-RM516)	RM509	90 µl	■
	RM510	90 µl	■

	RM723	60 µl	■
	RM724	60 µl	■

Storage

Store at -30 ~ -15°C and transport at ≤0°C.

Applications

Compatible for VAHTS Universal RNA Library Kit for Illumina (Vazyme #NR series).

Applicable for dual-indexed RNA library preparation for Illumina platforms.

Notes

For research use only. Not for use in diagnostic procedures.

1. The usage amount of adapter need be adjusted according to the amount of Input RNA.
2. The RNA adapter of different brands have different concentrations. Should be careful with the input amount when using this kit on RNA library preparation kits from other brands.
